2018 Frontier Precision Minnesota Survey Users Group Complete Session Line Up

10:00 am | Main Room

Opening Session

Introductions & Welcome

The purpose of the Minnesota Survey Users Group meeting is to allow users to meet annually with Frontier and Trimble Experts and receive up to date instruction on our solutions and services, while at the same time giving attendees the opportunity to network with industry experts. Welcome and Introductions will kick the day off!

10:15 am | Main Room

New Products & Solutions

*Introducing GeoSlam,
Trimble PenMap, & Trimble Catalyst*

In this session we will introduce a new handheld scanning mapping solution called GeoSlam ZebRevo, for interior and hard to reach spaces like manholes, tunnels, and caves. We will also introduce Trimble PenMap, a field data collection solution, and Trimble Catalyst, a software based GNSS field solution.

11:15 am | Main Room

UAS Update

*Latest updates to UAS in
Photogrammetry & Lidar*

In this session we will provide an update to legally using UAS solutions for surveying and mapping. We will cover the latest in photogrammetry applications and the new UAS Lidar solutions coming onto the market.

12:00 pm | Lunch

Included with your Registration

1:00 pm | Room 1

Trimble Access

What's New in Trimble Access

In this session we will go through the latest features of Trimble Access and how to employ them in the field to make your field crew more productive.

1:00 pm | Room 2

TBC & the SX10

*Trimble Scanning Module &
Introducing Trimble Clarity*

The Trimble SX10 has revolutionized the way we do traditional surveying with a Total Station or a Scanner. We will go through some common workflows for using the SX10 and show attendees some advanced features they can take to their next project.

2:00 pm | Room 1

Trimble Access

*Turn Your Robot Into a
More Productive Tool*

Learn the latest tips and tricks to using Trimble Access and your Trimble S Series Robot. We will cover all different aspects of using Trimble Access with your Robot and demonstrating to attendees the latest productive features of this powerful field software.

2:00 pm | Room 2

TBC Modules

*TBC Modules Including the Advanced
Drafting Module & Corridors*

In this session we will take you through the new workflow specific Modules of Trimble Business Center. Specifically focusing on Advanced Drafting Module features as well as Road Corridor features.

3:15 pm | Room 1

Trimble Access

Trimble Access from the Map Screen

Over the years Trimble has continued to pack more functionality and features into the Map Screen. In this session we will go over these productive features and show you the latest Map Screen layout and functionality.

3:15 pm | Room 2

TBC

What's New in Trimble Business Center

In this session we will focus on demonstrating tools that will make you more productive and efficient with your field data. New features will be gone through as well as an introduction to Trimble Clarity, a cloud-based data collaboration software tool.

4:15 pm | Main Room

Q&A

We will finish up the day with a Question and Answer session. Bring your questions, your "how to..." questions, and product feature enhancement requests, and we will spend the last hour going through them. This is a great productive session, where you can ask the experts!

5:00 pm | Main Room
