Geospatial Technology Firm Opens in Honolulu

HONOLULU, HAWAII – Frontier Precision, a U.S. based geospatial technology company, announced the opening of an office and service center in Honolulu, Hawaii. The facility, located at 2144 Auiki Street, will provide the company's full line of industry-leading products and services including training courses plus a full equipment repair service for the Hawaii Pacific Market.

"We are looking forward to serving the mapping, surveying, engineering, construction and natural resource professionals on the Hawaiian Islands," said Dennis Kemmesat, president and CEO of Frontier Precision. "We are one of the world's largest Trimble dealers and for the past 30 years we have been delivering solutions to our customers through the latest advancements in geospatial technology, training, professional service and repair."

Though best known for GNSS technology, Trimble integrates a wide range of positioning technologies including GNSS, laser, optical and inertial technologies with application software, wireless communications, and services to provide complete commercial solutions. These integrated solutions allow customers to collect, manage and analyze complex information faster and easier.

"We are bringing a new measure of excellence to the Hawaiian Islands," said Brennan O'Neill, branch manager for the Hawaii operations. "We are planning a grand opening for April 9-13, 2018, and during that time we will offer free training classes on scanning and surveying solutions along with GIS applications. We are inviting area professionals to our store so they can see, first-hand, our full-line of products and services plus provide an opportunity for them to talk with our experts about our training courses and repair services."

The Hawaii location will offer a full line of 3D laser scanning equipment, survey controllers, total stations, and survey GNSS receivers. The company also offers GIS mapping software, mobile GIS field mapping software, virtual reference stations, and mosquito control software. The Hawaii location also provides a full repair service along with a series of training sessions on equipment and software usage.

About Frontier Precision

This year, the company is celebrating its 30th year of operations. Frontier Precision is an employee-owned company with experience serving survey, mapping, engineering, construction, GIS, forestry, water resources, mosquito and vector control, and natural resources professionals throughout the United States. The company has offices in North Dakota, Minnesota, Colorado, Alaska, Montana, Idaho, and Hawaii. In addition, Frontier provides services in South Dakota, Wyoming, Utah, Oregon, and Washington. With Trimble Certified Service Centers in Bismarck, North Dakota; Minneapolis, Minnesota; Denver, Colorado; Anchorage, Alaska; and, Honolulu, Hawaii, the company provides in-depth technical support for Trimble mapping and survey products and software. The company has several Trimble Certified Trainers that offer Trimble and Esri training courses. Frontier Precision is an Esri Gold partner and also hosts the first DELAIR service centers located in the United States.
