TRIMBLE CERTIFIED TRAINING
**TerraSync with Trimble Positions
Add-In for Esri ArcMap**
FRONTIER MGIS TRAINING 2017
Maple Grove, MN | Bismarck, ND

Designed for both Beginners & Intermediate Level Users.

TerraSync and Trimble Positions for Esri's ArcGIS for Desktop is a class specifically designed for users who have made an investment in Esri's ArcGIS products. Trimble's TerraSync software is a tried and true solution for field data collection and has been a leader in the industry for many years.

This robust software is user friendly and versatile for your field collection needs. However, properly migrating Trimble field data into an Esri geodatabase can be a time-consuming, tricky process. Trimble Positions expedites your office workflow. This class will focus on how to integrate the TerraSync field workflow into the Esri environment using Positions add-in for ArcMap.

COURSE DETAILS:

- GNSS/GPS fundamentals & understanding technology.
- Best practices for field data capture, geodatabase design, & data processing.
- A check in/check out data workflow.
- Using Trimble hardware to achieve high accuracy.
