# ARCGIS FIELD MAPS ON-DEMAND TRAINING

January 16, 2025 | 10am CST

$195/Person

- Publish existing data or build layers from ArcGIS Online
- Configure GNSS metadata
- Enable attachments and learn about layer settings
- Create a web map for data collection: renaming layers, setting symbology, setting labels, setting basemap, creating bookmarks, sharing with a group
- Configure high-accuracy GNSS companion app (Trimble Mobile Manager or Juniper Geode Connect): real-time configuration, output datums, Geoid model (where applicable) and high accuracy GNSS receivers (DA2, Juniper Geode)
- Location Profile in ArcGIS Field Maps
- ArcGIS Field Maps settings: accuracy requirements, averaging, sync timing
- Offline workflows
- Understanding GNSS information in ArcGIS Field Maps
- Collect points, lines, and polygons
- Editing existing data
- Markups
- Layers, bookmarks, measuring, base maps
- Export from ArcGIS Online to other formats
