

# OMNIDOCK CUSTOMER TESTIMONIALS

Splendora Police Department near Houston, TX has been operating an OmniDock Standard with an M30T since April 2024. It supports DFR operations daily and is kept in an alert state at all times. Splendora intends to keep their OmniDock for a long time, they built a brick enclosure specifically for it!

"We love our OmniDock! It survived a hurricane and did not miss a beat. We were flying our drone from the dock in support of hurricane relief efforts the next day. We encourage anyone with an autonomous drone mission to make OmniDock part of their program."

**ALEX HADRYCH**

Assistant Chief: Splendora Police Department

Australia is host to 5 OmniDocks. They are used in the mining, agriculture and security sectors. OmniDock received CASA approval for BVLOS operations in Australia in December of 2023. The University of Southern Queensland uses their dual-magic OmniDock to perform multi-spectral crop yield analysis.

"Over the past couple years, Hover UAV has tested all of the drone-in-a-box solutions. The OmniDock is hands down our favorite. We purchased our first one in the summer of 2023 and have since bought another three units for Australian Customers. We highly recommend OmniDock!"

**JACKIE DUJMOVIC**

CEO of Hover UAV, Burleigh Heights, Australia
