

ASIO X

Streamlined inspection process. Fast decision making.

40K Lumens

20 Min
Flight Time

Gas Detection

Easy to Pilot

INTEGRATED MULTI-GAS DETECTOR

Detects, locates & quantifies 4 gases:
Methane, Hydrogen Sulfide, Oxygen,
Carbon Monoxide.

ULTRA BRIGHT LIGHTING

Illuminates confined spaces
to provide crystal clear
images with industry
leading 40K lumens.

LONGEST FLIGHT TIME

20 minutes per battery for a
full inspection in a single flight.

DUAL CAMERA SYSTEM

Dual 4K and Radiometric IR Cameras with
185° unobstructed vertical FOV.

ROBUST CAGE

Protects from impacts and collisions.

INTEGRATED ORIENTABLE LIDAR

Generates point clouds and highly accurate
crack and defect measurements.

EASY TO USE

Intuitive user interface and
controls to expedite the learning curve

STABLE IN HARSH ENVIRONMENTS

Advanced Radar-based
stabilization Technology
increases inspection success
in difficult environmental
conditions.

VIO TECHNOLOGY

Utilizes camera data and inertial sensors
to maintain precise positioning even in
GPS-denied environments.
