

SCAN TO TEKLA

3D Scanning for Manufacturing & Fabrication

Join Frontier Precision for a live introduction to Scanning workflows specific to the Manufacturing, Fabrication, and Industrial applications. The Tekla MFI team will join us to show what is new for Tekla users, and we will show how to use Trimble Connect to verify accuracy of steel.

SEPTEMBER 14, 2026

1:00 P.M. - 2:00 P.M. MT

What You Will Learn:

- How the Trimble X9 fits into Manufacturing, Fabrication, and Industrial workflows
- Basic scanning workflows inside Trimble FieldLink
- Best practices for sending to Trimble Tekla
- Performing steel QA/QC and inspection workflows
- Using scan data to identify issues before rework occurs
- Reviewing and sharing scan data in Trimble Connect
- Improving communication between field and office teams
- Practical workflows new users can start using immediately
