DAY 1 | NOV 18, 2026

## SITEWORKS BASICS

*[ INTRODUCTION FOR NEW USERS ]*

Build confidence with Trimble GNSS and Siteworks through hands-on training covering everyday field workflows from setup to export.

- GNSS fundamentals and Siteworks navigation
- Creating projects, work orders, and designs
- Loading and organizing project files
- Setting up a base and rover
- Introduction to site calibration and control checks
- Grade checking, topography, and as-builts
- Staking points, lines, and reference lines
- Exporting field data and WorksManager basics

DAY 2 | NOV 19, 2026

## ADVANCED SITEWORKS

*[ FOR EXPERIENCED USERS ]*

Expand your Siteworks skills with practical workflows for accurate layout, surface modeling, volumes, and field-to-office coordination.

- Setting up IBSS base stations
- Keying in Road Corridors
- Advanced stakeout and offset workflows
- Creating and editing in-field surfaces
- Measuring stockpiles and calculating volumes
- Managing design revisions and troubleshooting
- Data exchange with TBC and WorksManager
- Exporting as-builts and machine-ready files

*Requires Day 1 Training or Equivalent Field Experience.*
