**The industry's first truly portable, battery-operated
CCTV pipe crawler systems.**

Flexible with or without a CCTV Truck

Built for municipal pipe inspections as small as 8" (203 mm) in diameter, the **DT340 Pipe Crawler** is fully submersible. Being battery operated removes the need for a CCTV truck, generator or on-site power supply. Operate the DT340 Pipe Crawler with its easy to use handheld controller. View and record video, document inspections, and upload directly to an asset-management software.

Portable, battery operated Mini Pipe Crawler

The **DT320 Mini Pipe** crawler is designed with portability in mind. Allowing operators to conduct storm and wastewater inspections without the need for topside power. Deep Trekker crawlers and control units are powered by long lasting lithium ion batteries, everything you need to perform an inspection can fit into one or two wheeled cases.
