

# DJI DOCK 2

Easy Operation, Superior Results

## Simple Deployment

- Lightweight Design
- Vision-Based Site Evaluation for Quick Site Selection

## Safe and Reliable

- IP55 Dust and Water Resistant
- Real-Time Weather Change Detection
- Built-In Backup Battery
- Six-Month Maintenance Interval
- Email Notifications for Abnormal Conditions
- Precision Landing

## High-Performance Drone

- Matrice 3D: Integrated Wide-Angle Camera and Tele Camera, Suitable for Mapping
- Matrice 3TD: Integrated Wide-Angle Camera, Tele Camera, and Infrared Camera, Suitable for Security and Inspection
- IP54 Dust and Water Resistant
- 50-Min Max Flight Time
- 6-Directional Obstacle Sensing
- 10km Max Effective Operating Radius
- 400 Battery Cycles
- RTK Centimeter-Level Positioning

## Steady Operation

- Quick Takeoff
- Quick Charging
- Dual-Camera Monitoring

## Cloud-Based Operation

- Cloud Mapping
- Visual Flight Route Editing
- AI Spot-Check
- FlyTo Tasks
- Live Flight Controls via Keyboard and Mouse
- Obstacle Bypass

## Open Ecosystem

- Third-Party Payloads
- Edge Computing
- Private Deployment
- FlightHub 2 Coordination With Private Cloud

Note

\* The above data was collected in a controlled environment. Actual results may vary depending on the environment, usage, and firmware version. For details, please refer to the product page on the official DJI website. Third-party payloads are sold separately.
