

TECHNOLOGY WEBINAR | MONITORING

We invite you to register for our **FREE 60 minute live webinar**, about monitoring for today's Surveyors and Engineers!

Monitoring is becoming required on more projects everyday. What this means can vary from project to project. This webinar will go over the ways that Frontier Precision can assist on monitoring projects. We will talk about the many ways that you can begin monitoring; whether that is using traditional methods such as: Trimble Total Stations, or using modern geotechnical sensors now available from Trimble and Senceive.

Please join us for a **FREE 60-minute live webinar**.
We are sure you will find it informative!

Tuesday, December 14, 2021 at
9:00a PT, 10:00a MT, 11:00a CT and 12:00p ET
