## TETHERED M300 LIVE-STREAM DEMO

Watch a comprehensive live-stream demo of the DJI M300 with the Blue Vigil Power Tether System that will work with your entire fleet providing unlimited flight times.

### IN THIS DEMO WE WILL COVER:

- Preflight Set-up
- Takeoff
- In-flight Situational Awareness
- Landing
- Relaunch without Tether

Join us to see why the US manufactured RS1000 is the best tether investment for your fleet today.

*Have questions or want more information on this **FREE** live-stream event?*

## We Are Drone Innovators

Blue Vigil manufactures, distributes, and supports tether power systems for drones. The company has designed and tested a reactive spool tether system. The system is self-contained, includes proprietary power management circuitry, flight control system and can connect to most off-the-shelf UAVs. Therefore, drones powered by the Blue Vigil ground based tether systems can remain aloft as long as power is conveyed through the tether and do not require a dedicated operator. Blue Vigil was founded and is managed by a team of pilots and UAV experts. The team saw an unfilled need in the UAV industry for a tether system which was universally compatible with UAVs. Blue Vigil was founded in partnership with a Harrisonburg, Virginia Investor Group and James Madison University. Blue Vigil was launched in 2015.
