Take your ZEB-HORIZON to the Skies with the UAV Mount

Capture from new heights with improved relative accuracy without the need for an IMU, even in areas with low GPS. Coupled with the powerful DJI M600 UAS/Drone, the ZEB-HORIZON is **great** for airborne applications. The Matrice 600 Pro aerial platform is **built** for industrial applications.

ZEB HORIZON is your tool to capture, process and understand the world around you.

- Lightweight and rugged, the ZEB-HORIZON is simple to use, fast to capture and easy to process, so you have the most accurate information you need to make the most important decisions.
- Go further than ever before with the ZEB-HORIZON's range of mounting options. The ZEB-HORIZON can be mounted on a wide range of commercially available drones.

DJI Matrice 600 Pro - Simply professional performance.

- The Matrice 600 Pro (M600 Pro) inherits everything from the M600 with improved flight performance and better loading capacity.
- Pre-installed arms and antennas reduce time required for setup, and the system's modular design makes it easy to mount additional modules.
