

PRESS RELEASE

For Immediate Release

September 1, 2017

Frontier Precision[®], Inc. announces offering GeoSLAM's "go-anywhere" 3D mobile mapping technology.

Bismarck, ND (Corporate) – Frontier Precision is excited to announce its new partnership with GeoSLAM – a global market leader in 3D geospatial technology solutions. Frontier is now a reseller in Minnesota, North Dakota, South Dakota, Colorado, Wyoming, Utah, Montana, Idaho, Oregon, Washington, and Alaska.

At Frontier, we are dedicated to offering comprehensive, advanced solutions to solve all of your data and measurement needs. GeoSLAM's ZEB-REVO solution features a simple to use 'walk and scan' handheld scanner. This rapid scanner is specially designed for complex, confined, indoor, or underground spaces and can be handheld, pole, drone, or robot mounted. The processing software with the solution turns data into real-time 3D information, delivering rapid and accurate results within minutes ready to export to all major industry-standard formats.

Find out what the ZEB-REVO solution can do for you by contacting your local sales representative! Frontier Precision prides itself on its knowledgeable staff of industry professionals that provide you excellent service from field-to-finish. Whether you need support out in the field, or custom development to make an application work for your project, you can trust us to be your go-to resource.
